

Hybrid PACE Plus/Minus 20201014

- **POSITIVE**

- It allows PACE members to be either In-Class or Remote.
- Members might be Remote for different reasons:
 - Illness or threat of contagion / isolation
 - Don't want to wear mask / socially distance
 - Travel
 - Former members?
 - Just want to stay home ("bad hair day")
- In-Class members can see and hear Remote members.
 - Cart PC's projector can display Zoom Gallery.
 - Remote members can "Unmute" and be heard In-Class.
- Remote members can see and hear In-class members.
 - Phone cameras can show In-class members.
 - In-Class handheld mic can be heard by Remote members.
- Remote members can see our PACE classroom.
 - Cart PC can Share the program for Remote members.
 - Cart PC's camera can show part of the classroom.
 - Phone cameras can show other views.
- Watching on the "big screen" in class is as easy or even easier than watching at home.

- **NEGATIVE**

- Because of masks, it is difficult to understand spoken words.
This is even more difficult across Zoom.
- Social distancing in class is difficult because it is not what we want to do nor what we have always done.
- Zoom chat would only be with the In-Class host, not all In-Class.
- Remote members would only see what the In-Class cameras show.
